

Foil Fuser

FT-22 | FT-22F

• www.weiguan.com.tw
 • service@weiguan.com.tw

FT-22 and FT-22F use heater rollers to fuse foils to toner images from a laser printer or a duplicator. Wei Guan's foil fusers allow customers to quickly and simply produce beautiful, foiled images with optimum operation temperature and speed.

Features

- ▶ Foiling from Toner Images
- ▶ Simple to Operate
- ▶ No Make-Ready Supplies or Dies Required
- ▶ Digital Temperature and Speed Control

FT-22F and FT-22 can foil up to two rolls in one pass. FT-22F is an automated friction feed model and FT-22 is available as a manual feed one. Both of the models will accept sheets up to 320 mm wide. Foil rolls of any length that range between 50 mm and 320 mm are available.

Specifications

	FT-22	FT-22F
Available Paper Width		320mm
Minimum Paper Size	110mm x 50mm	110mm x 140mm
Maximum Roll Width		320mm
Minimum Roll Width		50mm
Foil Roll		2 foil rolls are available
Paper thickness		80gsm – 350gsm
Speed		800mm/min ~ 3250mm/min
Temperature Range		80°C ~ 140°C
Feeding Method	Hand Feed	Automated Friction Feed
Warm-Up Time		15 minutes
Power		AC 110V/220V, 50-60 Hz
